## ABOUT ME

A full stack developer proficient in modern web development technologies and comfortable with a wide range of libraries. Experienced with translating designs into web applications, interacting with APIs and building modern reusable scalable components for several years. Passionate about software development, optimizing code and enjoy building practical user-friendly applications. Always looking to grow as a developer, contribute to fulfilling projects and any opportunity to take on new challenges.

## EXPERIENCE

### Full-Stack Instructor, Journey Education – Montreal, QC

05/2022 – Present

- Taught a full-stack web development course of up to 60 students at Concordia University
- Researched and structured lessons while leading daily lectures and meetings
- Regularly tested and reviewed pull requests while providing practical solutions
- Constructed dynamic code or offered resources for challenges colleagues experienced
- Guided and managed teams of junior level developers in an agile project environment
- Clarified concepts and fundamentals to assist others with scaling and optimizing code
- Utilized best practices and built multiple MERN apps safe to deploy for production
- Created a safe and mindful space where students felt comfortable to learn and grow

### Freelance Web Developer, self-employed – Toronto, ON

08/2019 – Present

- Deployed, updated and maintained multiple e-commerce sites for local businesses
- Built and managed high quality portfolio sites with vanilla JavaScript and React.js
- Developed and integrated innovative features depending on what the client requested
- Troubleshoot and researched for effective modern best practices and solutions
- Ensured sites were mobile/tablet responsive and compatible on multiple browsers
- Oversaw the website alignment, typography, UI design, SEO, performance and more
- Explained complex technologies to clients in a simple and easy way to understand
- Provided and executed various solutions on ways to lower company expenses

### Lead Dispatcher, National Logistic Services – Mississauga, ON

07/2018 – 06/2019

- Managed and maintained data and information of all inbound and outbound shipments
- Led office to provide excellent customer service and guarantee all tasks are completed
- Communicated with staff and coworkers to ensure a safe and positive environment
- Implemented strategies to increase the overall efficiency and productivity of the team

### Graphic Designer, Zambah Music – Oshawa, ON

10/2013 – 08/2015

- Collaborated with a frontend developer to create the UI & UX Design of the application
- Designed digital and physical products for promotions and marketing
- Produced creative unique images and videos using Adobe Creative Suite
- Assisted with establishing and maintaining a strong company brand
